*Letter from the President*

**Because of Our Successful Past,  
We Look Forward to a Very Bright Future.**

In 2017, we begin our 115th year, a span of time that has included wars, a Great Depression, recessions, record inflation, and unprecedented low global interest rates. That we made it through those periods, and emerged stronger, with resolve to confront the next challenge to come along, speaks to the talented people within the Bank during all those years, and the Bank's Board and Management adhering to principles and values that focus on the long term.

The primary industry we serve, Agriculture, has also endured over those 115 years. Forced to confront technology changes, market globalization, commodity specialization, an increasing need for size, and every season's unpredictable weather. From 6,000,000 farms in 1945, there are now 2,000,000. From 14,000 banks in 1966, there are now 6,000. "Change", whether it be in farming or in banking, has been, and will continue to be, inevitable. Recognizing change, responding proactively, and moving ahead is a strategy both industries have to be committed to.

Farmers National Bank will continue meeting the banking needs of our customers and serving our communities. The saying "nothing lasts forever" is appropriate and true. Yet, the Bank's success over 115 years, the underlying philosophy, and a committed Board, Management, and Staff provide comfort to us that 2017, and the years beyond will not be just bright, but very bright.
